**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication;
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication;
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

### DETAILED ACTION

1. The following is a Non-Final Office Action in response to the communication received on January 14, 2004. Claims 1-6 are now pending in this application.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Desiraju et al. (U.S. 6,243,613).

As per claim 1, Desiraju et al. discloses a computer-implemented decision management process comprising:

applying a decision management strategy for controlling behavior of clients of an organization, the strategy being formed of components operating together (col. 6, lines 8-23; A material planning system and decision management system help users to determine the optimum strategies for suppliers.);

determining results of the applied strategy (col. 7, lines 39-45; The data is used to determine a current material policy of a supplier.);

selecting, by an end user of the process, a respective component forming the strategy for optimization, selecting, by the end user, potential replacement components and performance metrics for the potential replacement components and applying the selected potential replacement components to prior performance data of the clients (col. 7, lines 55-62; col. 8, lines 46-col. 9, line 11; Figures 7-8; A user can select components representing the current and recommended policies to review and analyze the components affecting the policies.);

determining results of the applied potential replacement components and automatically optimizing the selected component forming the strategy, in accordance with the determined results of the applied strategy, the determined results of the applied potential replacement components, and the metrics (col. 10, lines 1-17; col. 11, lines 10-17; Results of the strategies are determined so as to exclude or include certain options associated with the policies and select a final recommendation strategy.).

As per claim 2, Desiraju et al. discloses a computer-implemented decision management process as in claim 1, wherein the selected performance metrics includes a threshold for the potential replacement components, said automatically optimizing replacing the selected component with a respective replacement component if performance improvement results of the respective potential replacement component satisfy the threshold (col. 15, line 66-col. 16, line 25; Threshold values are used during assessing performance results.).

As per claim 3, Desiraju et al. discloses a computer-implemented decision management process as in claim 1, further comprising repeating the process of claim 1

for the applied strategy (col. 15, lines 30-41; Components of strategies and strategies themselves can be reviewed and analyzed by users at any time, thereby repeating the process for the applied strategy.).

Claims 4-6 recite limitations similar to the limitations rejected above. Therefore, claims 4-6 are rejected on the same basis as claims 1-3 above.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Shaw (U.S. 6,101,479) discusses a system and method for allocating company resources to fulfill customer expectations.
